Late

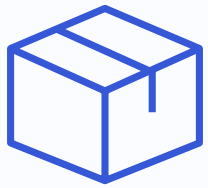

Unfinished

$$2 / 3 = \mathbf{66.7\%}$$

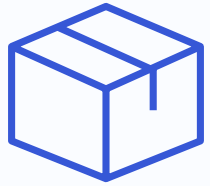

What if we count every parcel due?

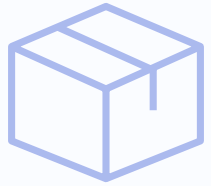

On time

On time

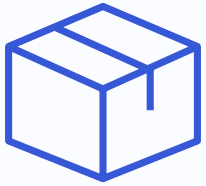

Late

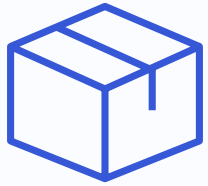

Unfinished

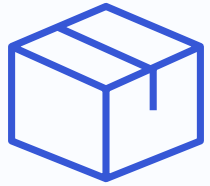

Include the unfinished parcel

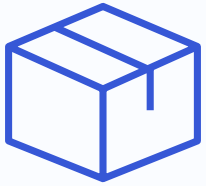

On time

On time

Late

Unfinished

$$2 / 4 = \mathbf{50.0\%}$$

Six parcels. What counts?

On time

On time

Late

Late

Unfinished

Unfinished

Count all six parcels due

On time

On time

Late

Late

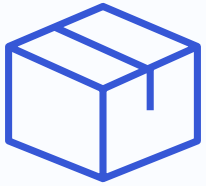

Unfinished

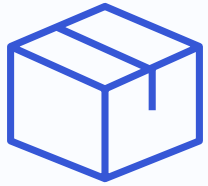

Unfinished

$$2 / 6 = 33.3\%$$

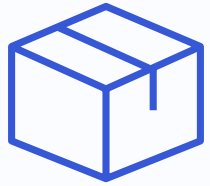

Record the rule. Check the calculation.
