What does a missing time mean?

Column record: delivered_at

TEXT · NULL allowed

SQLite type declaration

Not strict value enforcement

One missing time. Three possibilities.

Unfinished

Parcel has not arrived

Late update

Record has not caught up

Unknown

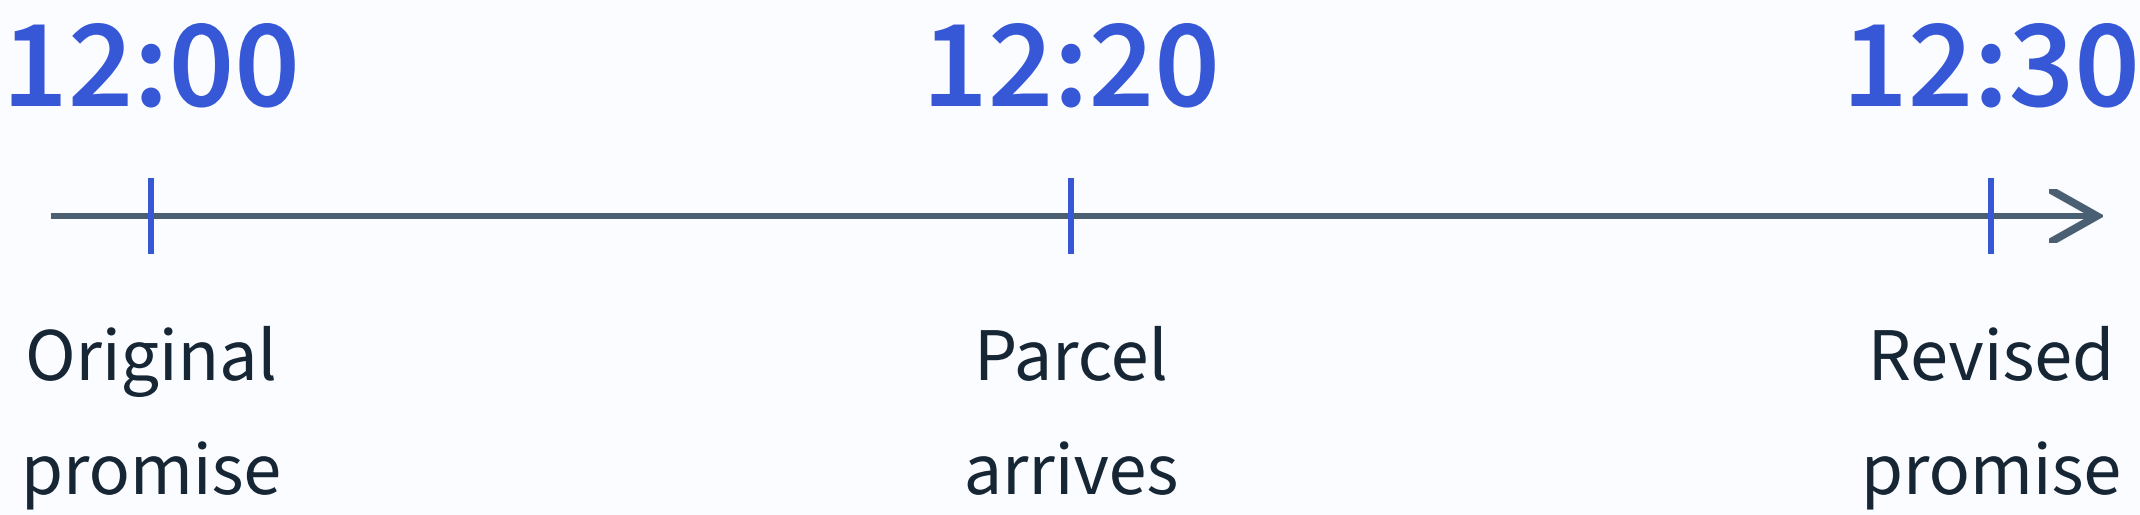

Arrival time unavailable

Meaning comes from the definition

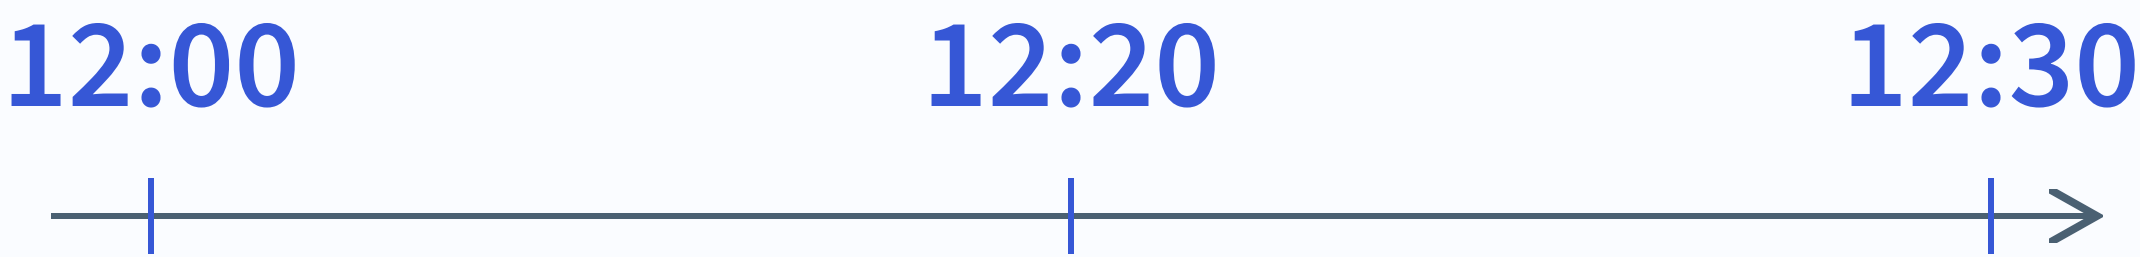

NULL = unfinished

In this complete invented example

Which promise does the column hold?

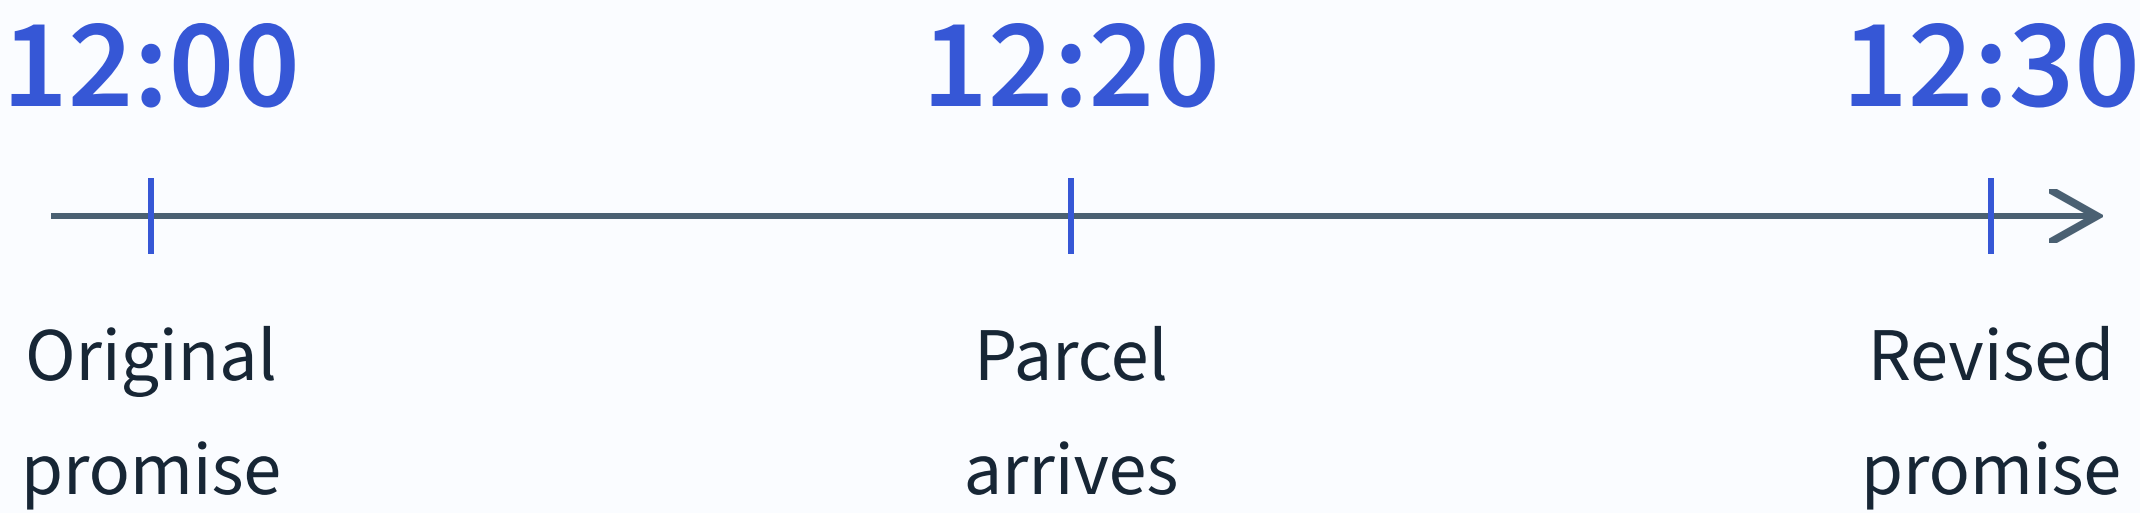

Which promise does the column hold?

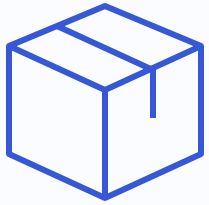

Original: late

Which promise does the column hold?

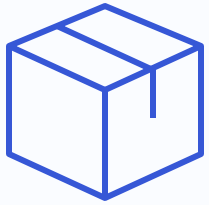

Original: late Revised: on time

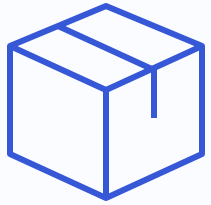

Which parcel does the filter remove?

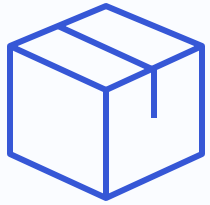

On time

On time

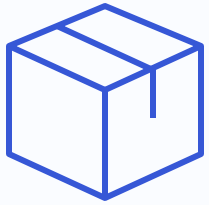

Late

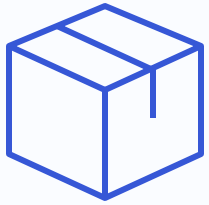

Unfinished

WHERE delivered_at IS NOT NULL

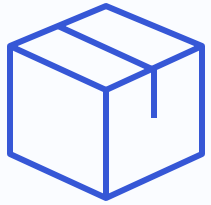

The unfinished parcel is excluded

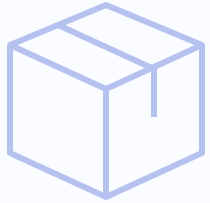

On time

On time

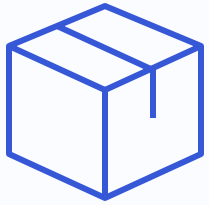

Late

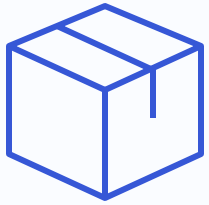

Unfinished

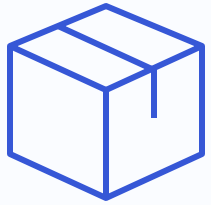

Three completed deliveries remain

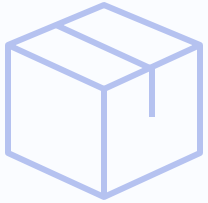

On time

On time

Late

Unfinished

2 / 3 = 66.7%

Does the query follow the rule?

Query: completed

66.7%

3 completed deliveries

Operations: all due

50.0%

4 parcels due
