# Refreshed. But when calculated?

**100%**

Report refresh: 13:00 UTC

Completed deliveries only

# Refreshing does not rerun the job

| Scheduled job | Saved output | Report refresh |
| --- | --- | --- |
| **Calculates** | **Stores result** | **Reads result** |

# Follow the exact output identifier

## Refresh F1300

**summary-R1205**

Refreshed 13:00 UTC

## Published output

**summary-R1205**

Published 12:05 UTC

# Follow the exact output identifier

## Refresh F1300

**summary-R1205**

Refreshed 13:00 UTC

## Published output

**summary-R1205**

Published 12:05 UTC

**Producing run: R1205**

# Would today's table reproduce it?

## R1205 retained input

**S1205**

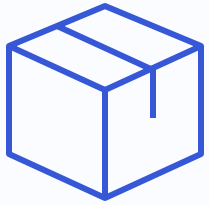

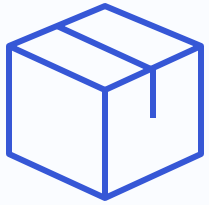

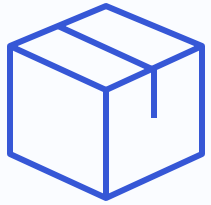

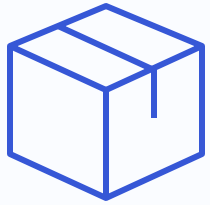

Saved input copy

## R1205 retained code

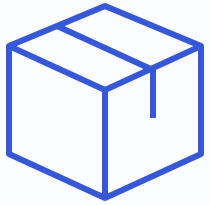

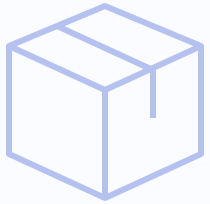

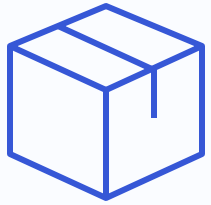

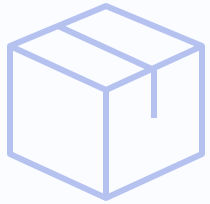

**completed-v1**

Executed version

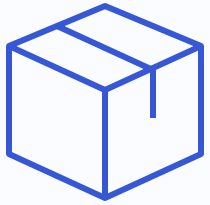

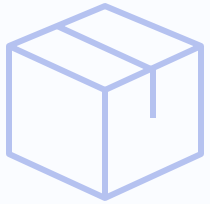

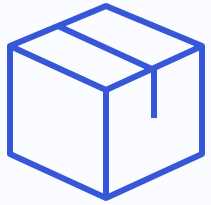

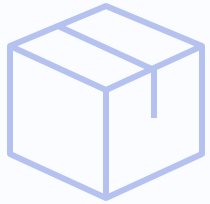

# Inspect the retained input at 12:05

| D101 | D102 | D103 | D104 |
| --- | --- | --- | --- |
|  |  |  |  |
| **On time** | **Unfinished** | **On time** | **Unfinished** |
| 11:50 | NULL | 11:40 | NULL |

# The code excludes unfinished parcels

| D101 | D102 | D103 | D104 |
| --- | --- | --- | --- |
|  |  |  |  |
| **On time** | **Unfinished** | **On time** | **Unfinished** |
| 11:50 | NULL | 11:40 | NULL |

# Both completed parcels were on time

| D101 | D102 | D103 | D104 |
| --- | --- | --- | --- |
|  |  |  |  |
| **On time** | **Unfinished** | **On time** | **Unfinished** |
| 11:50 | NULL | 11:40 | NULL |

**2 / 2 = 100%**

# Explain this particular result

Lineage

## Data flow and dependencies

Provenance

## A particular result's history

# Explained does not mean current

## Why 100%?

Still current at refresh?

Investigate in Chapter 4.

# Trace it in the metadata map

Report refresh → Published output → Run

**Output ID** → **Run ID** → **Input + code**

**Explain why the result was 100%.**

# Try it on the page

## Match the identifiers

Refresh → output → run → input + code
